

HOW CAN WE STOP POLLUTION?

The best way to fight pollution is to stop producing it in the first place. Governments can pass laws that forbid or limit the use of chemicals that cause pollution. Laws can stop factories from dumping poisonous chemicals in lakes, rivers, and the ocean. Factories and power plants can clean up the smoke that they give off.

Engineers can build cars that burn less gasoline. They can find ways for cars to give off cleaner exhaust gases. Scientists are looking for fuels to replace coal and oil. They are looking for ways to use the power in wind and in rays from the Sun. They are also looking for safe ways to get rid of nuclear waste.

We can help cut down on the amount of garbage we make. We can recycle papers, plastic, glass bottles, and metal cans.

1- Answer with True or False

- A - Governments made laws to stop the use of chemicals that cause pollution.
- B - We can invent cars friends to our environment.
- c - Scientists are trying to get secure solution to clear the nuclear waste.
- d - Recycled material gets used over again.

2- Read the text again then answer these questions.

- a- What is the best way to stop pollution ?
.....
- b- How can we participate to minimize the amount of garbage?
.....

3- What do these words refer to in the text?

- a- producing It... ..
- b- They can find

4- Give the synonym of :

- b- a-prohibit = §1.....
- b- recover = §3.....

5-Give the opposite of :

- c- a- illimit ≠ §1.....
- b - more ≠ §2.....

6- Re-write the following sentences differently.

- a-She said :< Recycling today is helping to minimize from land pollution>.
-She said that pollution.
- b- Laws can stop factories from dumping poisonous chemicals in lakes.
-Factoriesfrom dumping poisonous chemicals in lakes.

KEY ANSWERS

1- Answer with True or False

- A - Governments made laws to stop the use of chemicals that cause pollution. **False**
- B - We can invent cars friends to our environment. **True**
- c - Scientists are trying to get secure solution to clear the nuclear waste. **True**
- d - Recycled material gets used over again. **True**

2- Read the text again then answer these questions.

- c- What is the best way to stop pollution ?
The best way to fight pollution is to stop producing **it** in the first place.
- d- How can we participate to minimize the amount of garbage?
We can recycle papers, plastic, glass bottles, and metal cans.

3- What do these words refer to in the text?

- d- producing **It** pollution. b-**They** can find Engineers

4- Give the synonym of :

- e- a- forbid b- recycle

5-Give the opposite of :

- f- a- limit b - Less

6- Re-write the following sentences differently.

- a- She said that recycling that day was helping to minimize from land pollution
- b -Factories can be stopped by laws from dumping poisonous chemicals in lakes.
