<u>Name:</u> Class: **2AM** .....

#### <u>Text</u>

Influenza, also called the flu, is an infection that causes fever, chills, cough, body aches, headaches, and sometimes earaches. The flu is caused by the influenza virus. It's so small that you can't see it without a strong microscope.

The virus gets around in little drops that spray out of an infected mouth and nose when he or she sneezes, coughs, or even laughs.

People sometimes catch the flu from someone who has the flu when they breathe in some of these drops.

When you get the flu, you should start taking steps to feel better:

-Rest in bed.

-Drink lots of liquids.

-Take a pain reliever, but avoid aspirin.

-Wear thick clothes.

-Wash your hands.

-Don't share cups and eating utensils, like forks and spoons with anyone.

#### PART I: A/READING COMPREHENSION

Read the text carefully and do these activities (14 pts)
